

SMART MANUFACTURING SUMMIT 2017

MAY 16-17th
Seattle, Washington

Co-Hosted by The Boeing Company

Prepare Your Company for the Future of Manufacturing

The 5th Annual Smart Manufacturing Summit will offer 2-days of fresh thinking on the opportunities and challenges facing manufacturing executives, as well as provide the ideal environment to discuss best practices and trends in global markets, quality, supply chains, talent issues and more.

Strategies and solutions for addressing modern manufacturing challenges:

- Understanding the impact of robotics on manufacturing, and how to determine what's right for your organization now and in the future
- Training, reskilling, attracting and retaining manufacturing talent
- The impact of smart design and new materials on product design and production
- Creating a corporate structure to encourage entrepreneurship and risk taking

WHAT'S TO COME

Private Tour of The Boeing Company's Everett Factory.

Exclusive First Look of Microsoft's Future Technologies.

OUR HISTORY

Last year, attendees enjoyed a private tour of the Harley Davidson factory.

In 2015, guests had the opportunity to drive sports cars at the Indianapolis Motor Speedway.

PREVIOUS SMART MANUFACTURING SUMMIT ATTENDEES SAY...

“Your speakers were world class and every topic was relevant. We understand the challenges that the manufacturing community is dealing with regarding finding qualified candidates for their mid-level positions and are completely committed to being a solution provider. Your event allowed us to share that commitment with the right people and we truly appreciated it.” – Susan English, VP of Career Services and Partnerships, Lincoln Education Services

“Relevant roundtable sessions with appropriate levels of leaders. The discussion centered around real issues and not driven by businesses whose motive is consulting or selling to delegates. Very relevant digital and transformational manufacturing ideas. Excellent blend of plant tours.” – Amy Meyer; Vice President, Kohler Operating System

“The tours and roundtables were extremely interesting and educational.” – Donna Scholer; Chief Operating Officer, Microbiologics
